13 July 1974

HW:

Your 7/10/74 request for your long and detailed memo on a conversation with Liebergott in Boston, I fear I can't help. You'll recall that in providing copies of other memos you needed I told you I combed the two files where they possibly could be for a total of four months -- two months before and two following -- and sent you all I found. I don't see how I could have missed such a clearly described memo, and since I have no recollection dating from the time you sent them in the first place which corresponds with the detail you list, I have to conclude that this particular memo was not included among those you sent copies of here. I feel strongly I would have some recollection of at least some of the detail you mention, and have none.

Sorry, and if you can think of any further clues, let me know.
